

ČVORNA TOČKA POLIGONSKIH VLAKOVA

Tomislav Sliepčević

ČVORNA TOČKA POLIGONSKIH VLAKOVA

ČVORNA TOČKA POLIGONSKIH VLAKOVA

ČVORNA TOČKA POLIGONSKIH VLAKOVA

Približni smjerni kutovi

$$\left. \begin{array}{l} v_I^1 = v_a^b + [\beta]_1 \pm n_1 \cdot 180^\circ \\ v_I^2 = v_d^c + [\beta]_2 \pm n_2 \cdot 180^\circ \\ v_I^3 = v_f^e + [\beta]_3 \pm n_3 \cdot 180^\circ \end{array} \right\} \dots \text{IMA}$$

Definitivni smjerni kut

Smjerni kut na zajedničkoj bazi računat će se na temelju

opće aritmetičke sredine koja glasi :

$$L = \frac{l_1 \cdot p_1 + l_2 \cdot p_2 + \dots + l_n \cdot p_n}{p_1 + p_2 + \dots + p_n} = \frac{[l \cdot p]}{[p]}$$

$$v_I = \frac{v_I^1 \cdot p_1 + v_I^2 \cdot p_2 + v_I^3 \cdot p_3}{p_1 + p_2 + p_3} = \frac{[v \cdot p]}{[p]} \quad \dots \text{TREBA}$$

Težine p_i bit će u ovisnosti o broju prelomnih i veznih kutova n_i , tj. $p_i = \frac{1}{n_i}$

$$\text{TREBA - IMA} = v_I - v_I^1 = f_\beta^1$$

$$v_I - v_I^2 = f_\beta^2$$

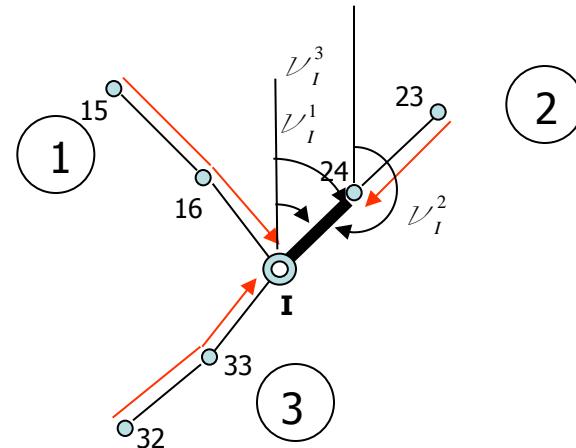

$$v_I - v_I^3 = f_\beta^3$$

Kutne nesuglasice koje moraju biti u okviru dopuštenog odstupanja $\Delta\beta$

$$(f_\beta \leq \Delta\beta)$$

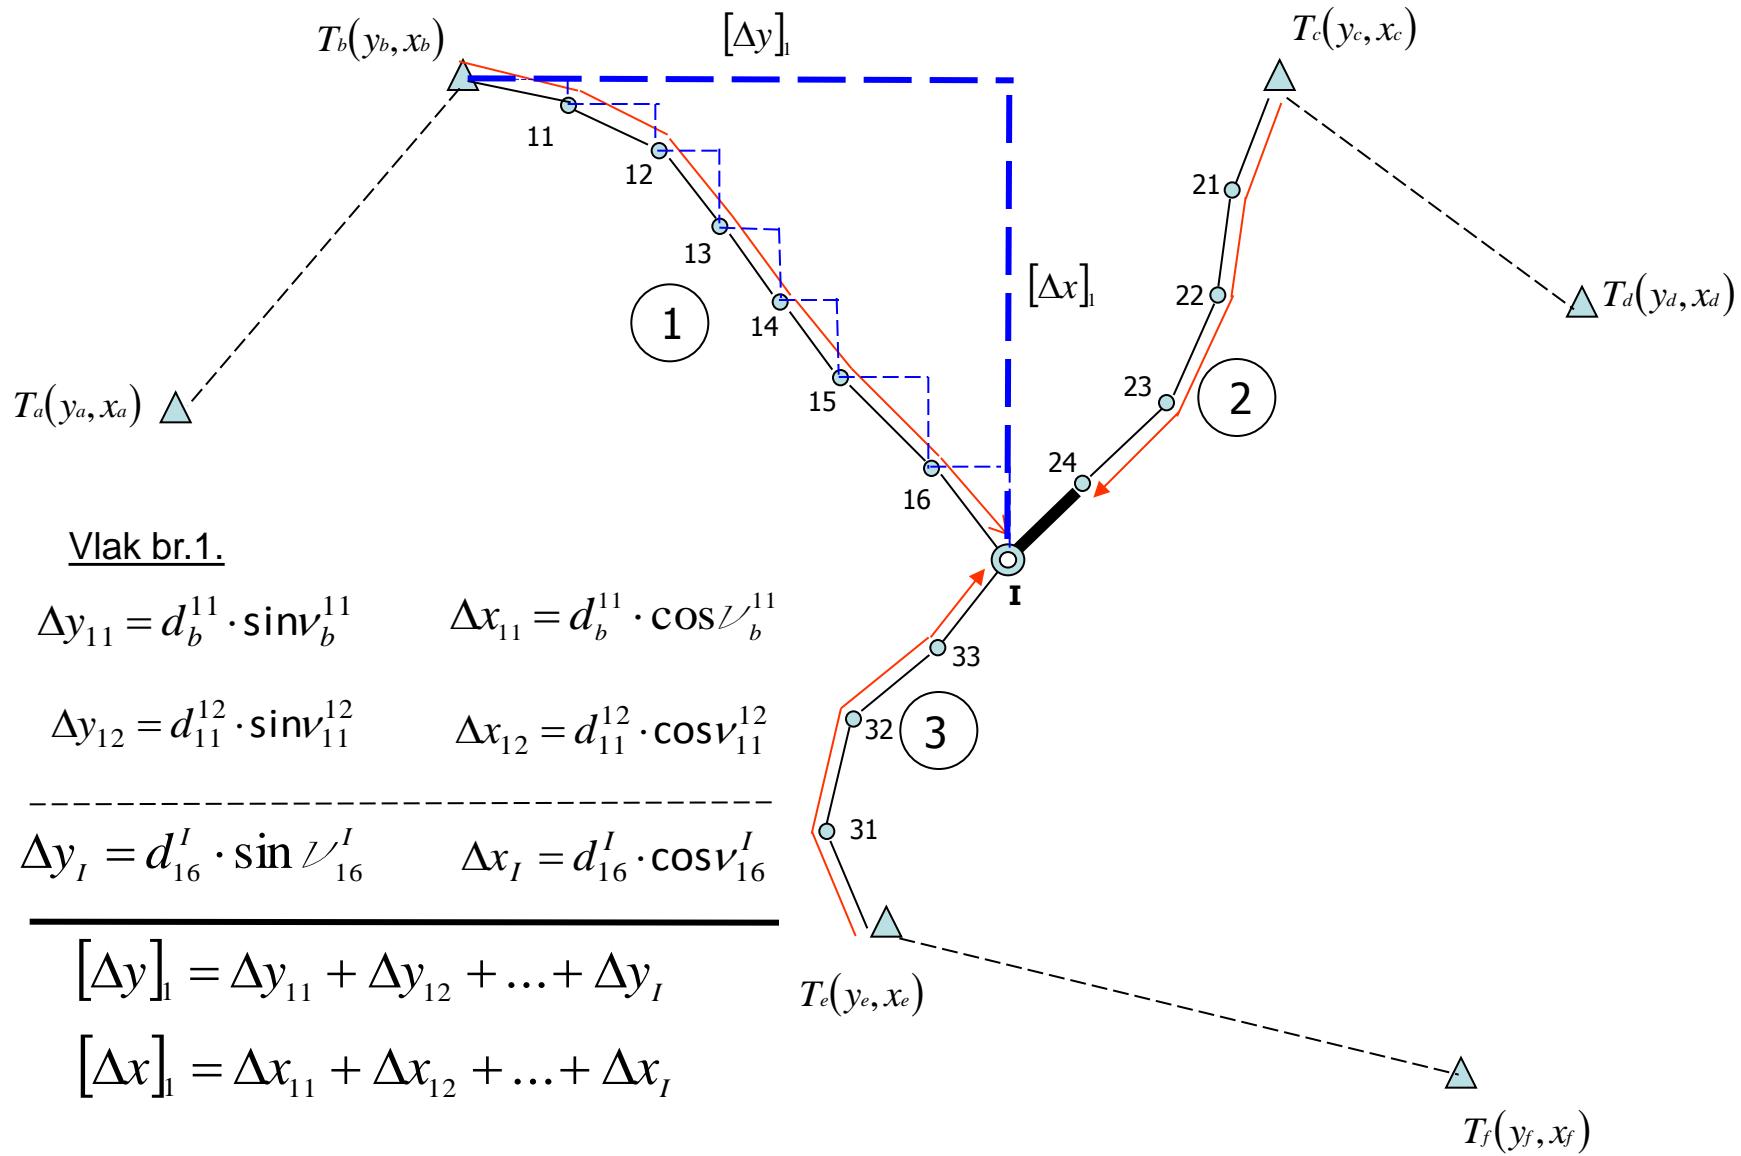

$$V_\beta^1 = \frac{f_\beta}{n_1} \quad V_\beta^2 = \frac{f_\beta}{n_2} \quad V_\beta^3 = \frac{f_\beta}{n_3} \quad \text{Popravke prelomnih i veznih kutova svakog poligonskog vlaka}$$

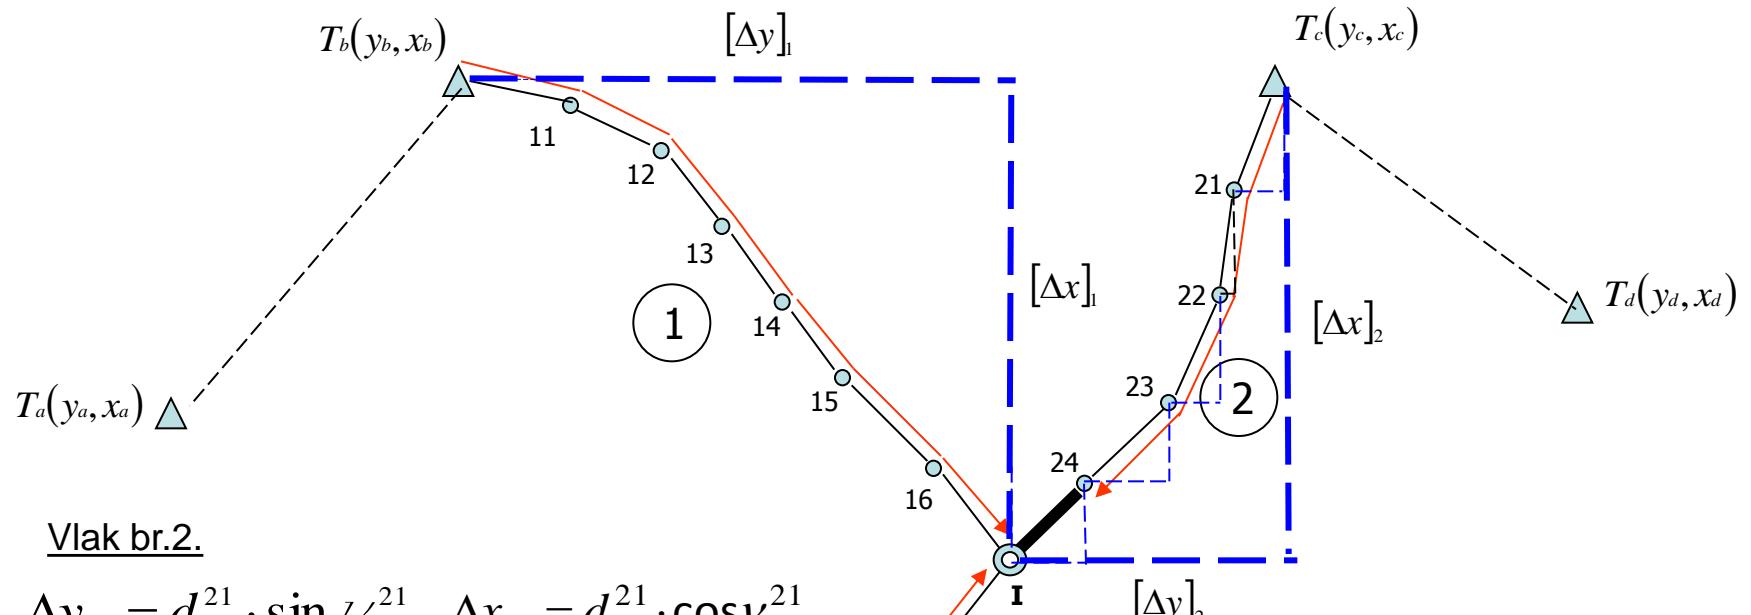

Nakon popravke prelomnih i veznih kutova u tr.obr.br.19. prelazi se na računanje definitivnih smjernih kutova svake poligonske stranice.

ČVORNA TOČKA POLIGONSKIH VLAKOVA

Nakon popravljenih mjerenih kutova, i smjernih kutova polig.stranica, računaju se približne koordinatne razlike.

Vlak br.2.

$$\Delta y_{21} = d_c^{21} \cdot \sin \nu_c^{21} \quad \Delta x_{11} = d_c^{21} \cdot \cos \nu_c^{21}$$

$$\Delta y_{22} = d_{21}^{22} \cdot \sin \nu_{21}^{22} \quad \Delta x_{22} = d_{21}^{22} \cdot \cos \nu_{21}^{22}$$

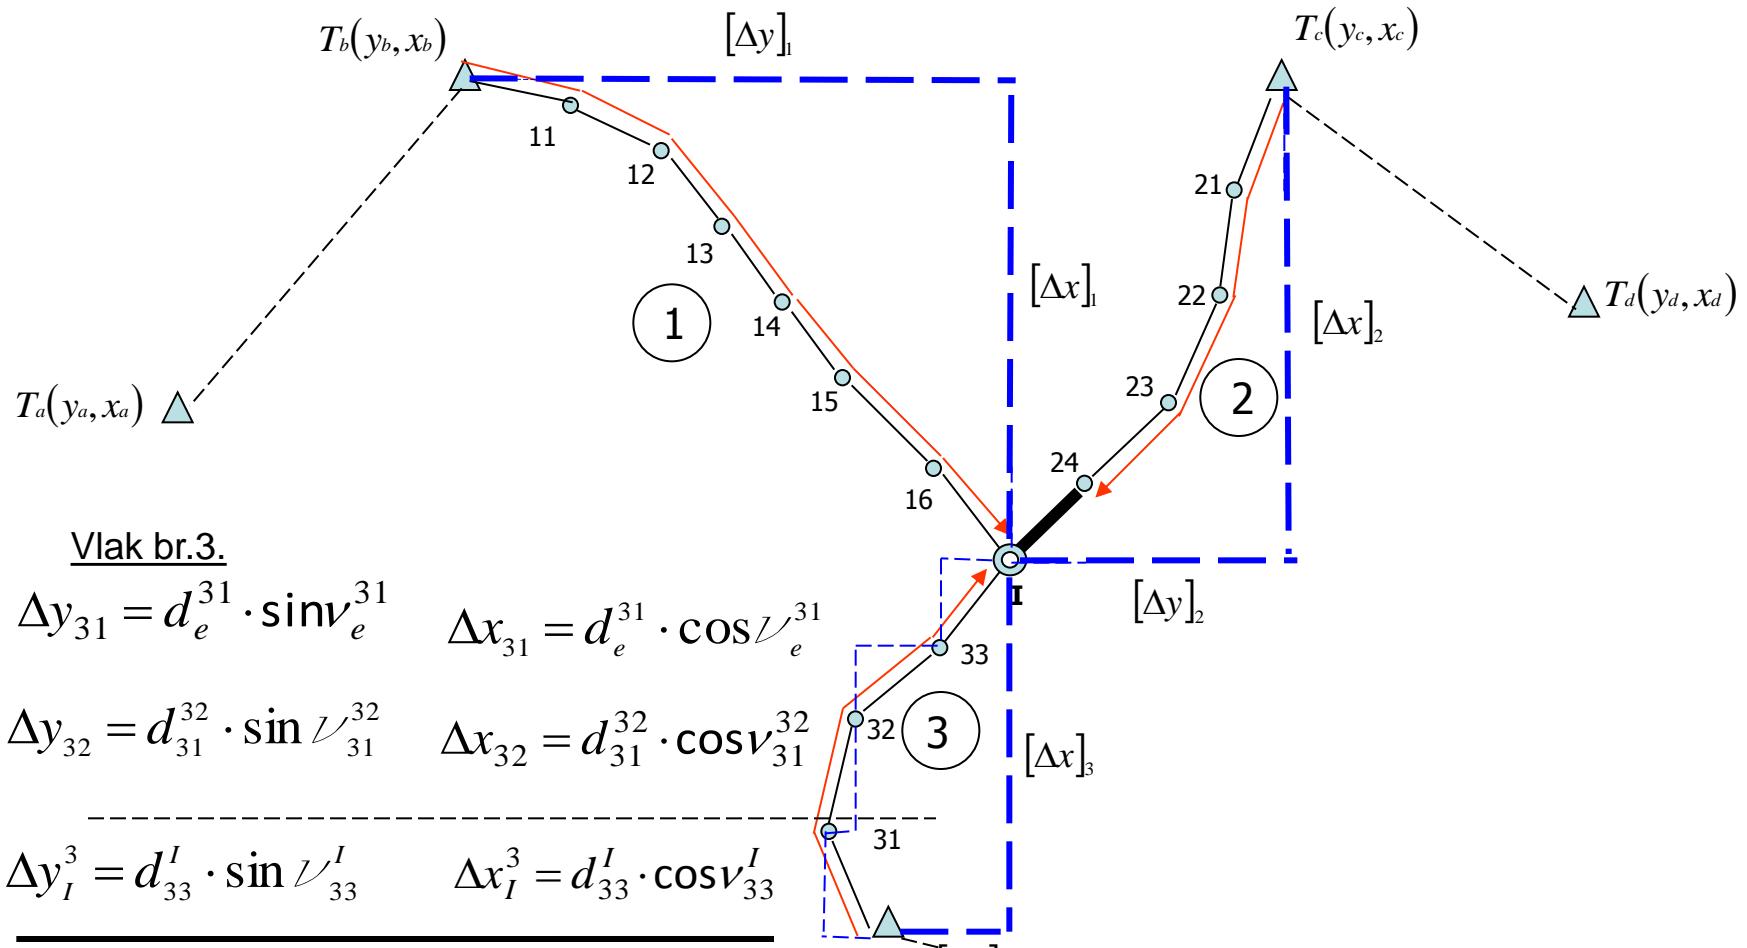

$$\Delta y_I^2 = d_{24}^I \cdot \sin \nu_{24}^I \quad \Delta x_I^2 = d_{24}^I \cdot \cos \nu_{24}^I$$

$$[\Delta y]_2 = \Delta y_{21} + \Delta y_{22} + \dots + \Delta y_I^2$$

$$T_e(y_e, x_e)$$

$$[\Delta x]_2 = \Delta x_{21} + \Delta x_{22} + \dots + \Delta x_I^2$$

$$T_f(y_f, x_f)$$

$$[\Delta y]_3 = \Delta y_{31} + \Delta y_{32} + \dots + \Delta y_I^3$$

$$[\Delta x]_3 = \Delta x_{31} + \Delta x_{32} + \dots + \Delta x_I^3$$

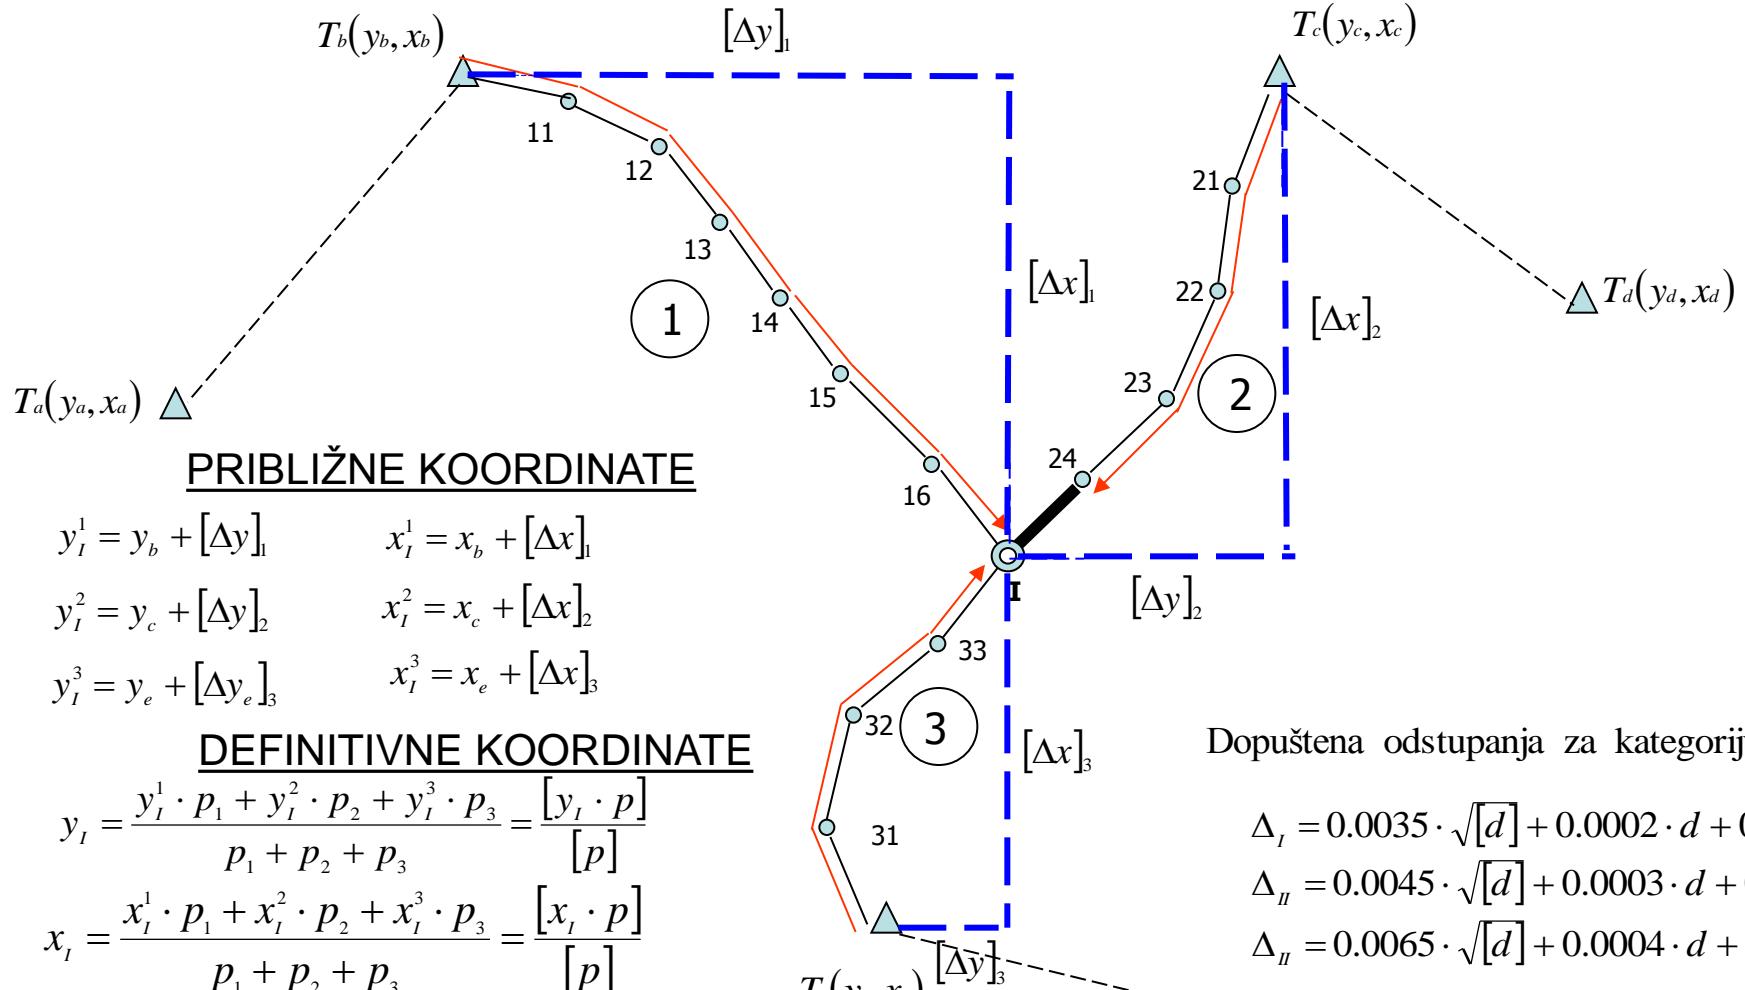

$$T_e(y_e, x_e)$$

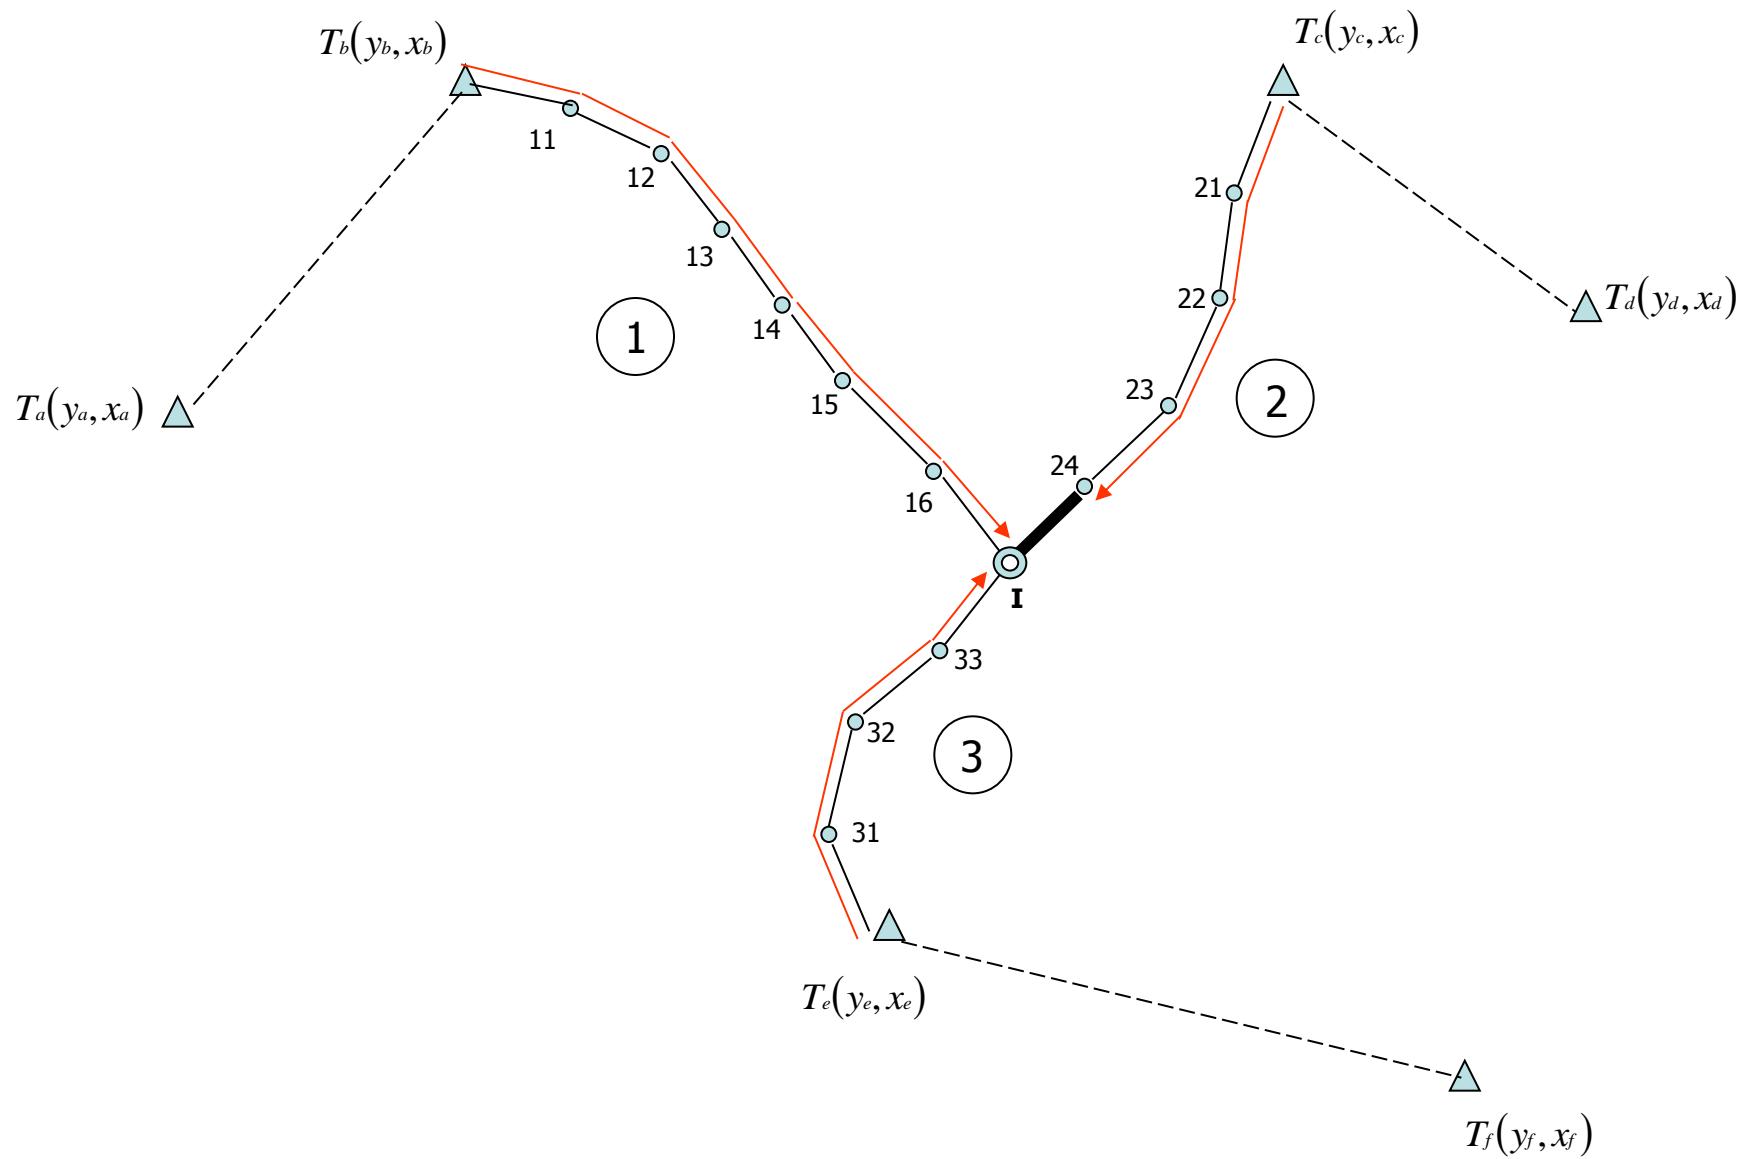

$$[\Delta y]_3$$

$$T_f(y_f, x_f)$$

$$\triangle$$
